Timeless design powered by electricity, fuel and the sun. Vehicles unapologetically conspicuous in their beauty and uncommonly light in their footprint. An unparalleled ownership experience, focused on the few. We are wired differently. And we know you are too.
It is easy to describe a responsible company. It is harder to be one. Karma is more than just a name to us. We act with intention, with an awareness of what we are doing, and how and why we are doing it. All cars have a soul, and that soul is us. Hundreds of people making thousands of decisions that, we hope, speak to you.
Our company, our vehicles and our passion are born and bred in California. We are influenced by the mountains, the desert, the ocean, the light. We live and work here, and that matters. We are creating history; no vehicle has been assembled in Southern California in decades. Until now.
Our people are the beating heart of our company. Individuals from the worlds of technology, aerospace, art, entertainment and automotive blend their diverse skills seamlessly to create a uniquely talented team.
Cars have become commodities. Design has taken a back seat, and most everything on the road looks the same. Not here. We designed our vehicles with proportions from the gods. The result: an almost primal beauty. Timeless and modern. Voluptuous and sensual. Created to elicit a visceral, emotional response.
The Revero’s exterior design language, with its flowing lines and muscular curves, is mirrored in the vehicle’s interior. The cabin is sumptuous; it cocooned you, overloading your senses with the carefully crafted mix of materials and exceptional craftsmanship.
OUR WORLD

If you drive less than 50 miles per trip, you may never buy gas again. Some of you will buy less than a gallon of gas for every 100 miles driven. We are not perfect, but we do what we can to produce an ecologically-sensitive product.
The badge on each Revero is hand-painted by an artist and set in a precision-machined ring of aluminum. Look closely and you may notice some subtle differences between each unique piece, so every car we make is truly one of a kind.
OUR BRAINS AND OUR BRAWN

The Revero is about feel, not numbers. No knowledge of its 0-60 time will help you define its allure. We can and will quote impressive vehicle technical specs. But we would rather state our performance story differently: we have enough. To move you. In every way.

PERFORMANCE

The Revero delivers exhilarating performance thanks to its lightweight aluminum spaceframe construction and the near limitless torque produced by the vehicle’s dual electric motors. Acceleration off the line is linear, smooth and swift.

DRIVABILITY

Responsiveness has never felt so supple. The low, centrally-mounted battery pack gives the Revero an exceptionally low center of gravity and near 50:50 weight distribution. The auto-leveling suspension system adjusts its stance when it needs to for perfect poise in all road conditions.

EXTENDED RANGE

The Revero’s lithium-ion battery powers its electric motors to turn the rear wheels – giving up to 50 miles of pure-electric driving range. After that, the gas-powered generator automatically engages to continue your journey. Should you find yourself at the end of the Revero’s 300-mile range, you have flexibility: you may recharge the lithium-ion battery or simply fill the gasoline tank and continue on to your destination.
**SOLAR ROOF**

The solar roof not only charges the 12 V battery, but also charges the high-voltage battery, adding to the electric range. Its unique pattern isn’t just for show. Our solar roof was developed for maximum efficiency by optimizing sunlight angles. It is an industry-first, and it is a signature element of our DNA.

**BRAKES**

The Revero’s monobloc six-piston calipers work in tandem with our regenerative braking technology to slow the Revero while recharging the high-voltage battery. The powerful brakes resist fade, clamping down with steadfast confidence. This electronically-controlled system not only allows the Revero to operate efficiently, but also reduces wear on the brake components.
There is beauty in simplicity. An intuitive touchscreen interface controls the vehicle’s audio, navigation and personal drive settings without complex toggles and switches. The elegant diamond design language is a Karma signature which echoes the diamond inlets on the front and rear of the car.

Infotainment

Vintners often invoke the scent of leather when crafting a new wine. The warm, earthy aroma of leather inspires us, it grounds us, it’s engrained in our memory. We use only minimal tanning and paint processes, allowing our leather’s alluring natural scent to fill the cabin. This vehicle was made to stimulate all your senses.

Leather

Your Revero reflects your taste. Those who find inspiration in our modern world may be moved by carbon fiber. This aerospace-derived material lends a sharp texture to our dark and sport-focused interiors. For those of you with an older soul, only the warm, unmanufactured touch of wood will do. Our wood trim comes straight from nature so each individual piece has its own story.

Interior Trim

Leather

Bottari
Optional caliper colors come with two-piece front rotors.
We are not for everybody, and we never will be.
No one needs a product like this.
We exist for those who have to have one.
**GENERAL INFORMATION**

Manufacturing Facility: Moreno Valley, CA

Drive Modes: H, E (PHEV, EV), AWD

Frame/Construction: Aluminum

Weight Distribution: 52.6 / 47.4 (front / rear)

Turbo: 0.8 kWh HV battery (LiFePO₄)

Batteries: Mid-mounted lithium-ion

Stealth Mode Acceleration: 0-60 mph in 6.9 sec, 95 mph (153 km/h)

Sport Mode Acceleration: 0-60 mph in 5.4 sec, 125 mph (200 km/h)

**PERFORMANCE**

Top Speed (electric only): 125 mph

MPG: 9.5 / 36 (US gal/l)

**ELECTRICAL**

Battery Capacity: 0.8 kWh

Charging Level 1: 120 V at 16 amps

Charging Level II: 240 V at 32 amps

Charging DC Quick Charge: Allows charging in 20 mins on 80% of battery

Mobile Charging Equipment: 3.3 kW mobile charge cord (autoswitching 110 V/240 V)

**POWERTRAIN**

Type: Single-ratio gearbox with limited slip differential

Rear Drive Module (RDM): Slip differential

Drag Coefficient: 0.38 Cd

Steer By Wire: Electrically-actuated rear control arms with limited slip joints

Suspension Type: Four-wheel independent suspension with "Steering-Long Arm" (SLA) architecture

**SAFETY**

Airbags: Eight total airbags: two-stage driver/ front passenger airbags; full-length side-curtain airbags; driver/ front passenger knee airbags; and two-stage passenger airbags; knee airbags; and 24 mm diameter stabilizer bar

Pedestrian Awareness: Audible external pedestrian sound for Children) compliant

Child Seats: LATCH (Lower Anchors and Tethers for Children) compliant

**INFOTAINMENT**

Audio: 225 W RMS with seven speakers and one subwoofer

Radio: AM/FM

Bluetooth®: Apple CarPlay and Android Auto™

**COMFORT AND CONVENIENCE**

Heated: Front and rear seats, outside mirrors, inside mirrors, and steering wheel

Voice Control with Apple CarPlay

Programmable easy entry and voice control with Apple CarPlay

Programmable Homelink

electro-hydraulic power assist

Parking brake: Electrically-actuated rear

**ELECTRICAL**

Battery Capacity: Total:

Charging Level 1: 30V at 16amps

Charging Level II: 47V at 32amps

Charging DC Quick Charge: Allows charging in 20 mins on 80% of battery

Mobile Charging Equipment: 3.3 kW mobile charge cord (autoswitching 110 V/240 V)
